

Marlet Property Group CO2 Footprint

Scope	Activity Type	2021
Scope 1 (tCO2e)	Stationary combustion	74.92
	Fugitive emissions from air-conditioning	0.00
	Other fugitive or process emissions	
	Scope 1 - Total	74.92
Scope 2 (tCO2e)	Purchased electricity - location based	11.92
	Purchased electricity - market based	0.00
	Scope 2 - Location based	11.92
	Scope 2 - Market based	0.00
Total Scope 1 & 2 emissions (using location-based emission factors)		86.84
Total Scope 1 & 2 emissions (using market-based emission factors)		74.92

Notes:

- This table represents the direct (scope 1) and indirect (scope 2) for the calendar year 2021
- This table and calculations were compiled using the greenhouse gas protocol template
- Market based emission factors are sourced from commission for regulation of utilities *CRU.ie*
- Location based emission factors for Ireland are sourced from the sustainable energy authority of Ireland *seai.ie*
- Our organisational boundary reporting approach is the financial control approach meaning that we only account for the emissions of operations that we have direct financial control over
